

# e-Authentication

## Smart Tips

*Actively protecting yourself is more effective than merely relying on others*

**DO**

Check website authenticity

**DON'T**

Give off sensitive information to unauthenticated source

Check account status, activities, and login records regularly

Authenticate or login from public terminals

Keep your cards and security devices safe

Keep written records of your account information

Keep emergency or loss reporting numbers of all your accounts

Follow the web links provided by untrusted sources

Choose a password that is easy to remember but hard to guess

Share your accounts or passwords with others
